

# Welcome to Paragon Laboratories (Ayu.)

# About Paragon Laboratories (AYU)

To create confidence in herbal medicines among the disadvantaged communities and to make the practice sustainable, DALIT established an Ayurvedic Medicine production unit since 2004 with the cooperation of COE, Italy. Paragon Laboratories (Ayurvedic) located in Chuknagar of Dumuria upazila under Khulna District.

## About Paragon Laboratories (AYU)

DALIT aimed to improve the health conditions of the poor villagers (especially mothers and children) living in rural areas by providing low cost (Ayurvedic) treatment. The curative treatment is always costly. Ayurvedic treatment is cost effective, attainable and side effect free. That is why DALIT introduced Ayurvedic treatment in its services. People of all concern and the statistics proved that Ayurvedic treatment becoming familiar than the Allopathic.

Ayurvedic practitioners are commonly known as Kaviraj (village healer). The Kaviraj plays a very important role in rural health service. Paragon Laboratories wants to develop their capacities so they can continue the Ayurvedic practices following the proper method. So DALIT provided them with many relevant books and training to enhance their skills.

## About Paragon Laboratories (AYU)

In continuation of this, with the aim of producing herbal medicine in a hygienic way, Paragon Laboratories was able to develop as a financial, social and human institution by obtaining a manufacturing license from the Directorate of Drug Administration of Bangladesh in 2009. It's drug manufacturing License No: AYU-149. Paragon Laboratories has been working steadily for 12 years, providing quality and quantity of Ayurvedic medicines with great reputation. The institution is also surrounded by an medicinal plants garden with 126 different species of plants. Vines, leaves, fruits, flower stems and roots are collected from this garden for the production of medicines. Paragon Laboratories' currently producing 24 types of medicines and the unit is also producing another 10 types of medicines for clinical purpose.
